

The Quest Solution for Direct Store Delivery

with **VIA**™ **DSD**

VITAL INFORMATION ANYWHERE™

Empower Your Workforce

Increase productivity

VIA DSD is a collection of applications for portable devices that extends the power of your existing system out to your field associates to enhance efficiency in route environments. Adding the functionality of DEX allows DSD vendors to transmit invoice details into a store's receiving system allowing adjustments and invoicing to be generated automatically.

The quality of information exchanged between your field associates and corporate office determines the efficiency of your process. **VIA DSD** uses the latest in data capture technologies, such as bar code scanning and signature capture. **VIA DSD** allows two-way communication to your field personnel – as sales orders are sent in, customer and pricing information is updated on the handheld device. Eliminate the time consuming and error-prone process of faxing or phone in orders or proof of delivery documentation to be entered manually.

VIA DSD connects field personnel to their Vital Information

While en-route, the user can access the customers and SKUs by look-up. Bar codes can be scanned to take an inventory, create a sales order, process returns or deliver orders. Variable pricing levels are supported. Order or delivery confirmation is indicated with signature capture with the option to print out a receipt. Completed transactions can then be uploaded to the corporate office.

Features and Benefits

- Supports all major manufacturers of Pocket PC and WinCE portable data terminals.
- Priced per module, **VIA DSD** is affordable for any size company
- Increases field productivity
- Supports look-up validation to access customer and SKU information
- Communication options include: Wide Area, 802.11 a/b/g, and Dial-Up Modem
- Customizable to meet unique needs
- **VIA DSD** utilizes Quest Solution's **WTMip** secure communication package for downloading customer, product, and order information to the portable devices and for uploading sales orders and delivery confirmation data from the portables
- **DEX**
 - Automate invoice process
 - Cost comparison
 - Flexible check in
 - Reduced paperwork
 - Identification of account discrepancies
