- DB Database

Extend your business beyond the four walls.

WTMiP provides the conduit between your corporate world and the mobile worker. WTMiP server allows files and data to be synchronized between the corporate host and laptops, hand helds and Windows CE or Windows Mobile devices. While providing version control, and insuring the mobile workers have the most up to date data, WTMiP utilizes several different forms of communication, including the Internet, Wireless, Wide Area networks, and Dial-up to connect the mobile worker to the corporate world.

WTMiP is the result of over 20 years of experience and is used by thousands of customers.

With the ever present pressure of competition, we are all being asked to do more with less. You have fewer resources in IT to service your users. You have a constantly changing world of upgrades and changes. WTMiP allows you to make the safe decision that is proven with many other industry leaders. You give your team the information they want when they want it, securely and under budget.

Service and Support Available

- Technical support
- Installation and setup
- Maintenance
- Application support
- Hardware support
- Migration from your current design

ROI

By eliminating mistakes or redundant data entry, implementing a WTMiP system will result in: improved profits, reduced inventory, decreased costs and reduction of labor.

Security

This system has been described as "FTP on steroids": an additional 128 bit security is built into the system and management reports help spot problems quickly. These built-in security measures prevent access to and misuse of your business-critical information.
